TECHNICAL SKILLS

Programming Languages:

Python | Java | JavaScript | Docker

Frameworks:

Pytorch | Scikit-learn | Pandas | React | Langchain | Langgraph | Algorithms | NLTK | FastAPI | Git |Springboot

Databases:

PostgreSQL | Firebase

Software Packages and Tools:

Vs code, Postman, Antigravity, Jupyter, google colab ,Tableau, Microsoft Power BI

INTERESTS

Coding Playing video Games

LANGUAGES KNOWN

English Marathi Hindi

EDUCATION

MCA | Thakur Institute of Management Studies Career Development& Research (TIMSCDR), Mumbai| Pursuing | 8.94 (CGPA)|2027
University of Mumbai

BACHELOR DEGREE | | 7.61 (CGPA) | 2025
Bachelor of Computer Application
Yashwantrao Chavan Maharashtra Open University

XII (HSC)| Bhavan's College| 48.33 % | 2022
Science
Maharashtra State Board of Secondary and Higher Secondary

X (SSC) | St Xavier's School| 77.60 % | 2020
Maharashtra State Board of Secondary and Higher Secondary

Experience

AI and software Engineering Intern | Alesa AI Ltd | UK, Remote (Sept 25 – March 26)

- Engineered a specialized AI microservice using FastAPI that integrates OCR technology to extract text from documents, coupled with Large Language Models (LLMs) to generate concise, context-aware summaries.
- Designed a modular AI architecture to ensure the system is scalable and ready for future generative AI feature integrations.
- Spearheaded the full-stack integration, orchestrating seamless data flow and API communication between the React-based frontend and the distributed backend infrastructure.

PROJECTS UNDERTAKEN

DevLegacy | GitHub developer skills analyzer| Github| Live |Completed (Jan '26)

- Developed a comprehensive developer analytics platform that leverages the GitHub GraphQL API to aggregate user repository data and visualize deep insights into coding habits and contribution history.
- Fine -tuned the CodeLlama Large Language Model (LLM) on a custom dataset to perform automated code quality analysis, accurately classifying developer proficiency levels and code maintainability.
- Engineered a role recommendation system using TF-IDF and Scikit-learn to analyze codebase semantics and commit history, predicting optimal engineering roles (e.g., Backend, Data Scientist) for users.

Question generator| Question Paper Generator & AI Analytics Platform |Github|Live Completed (Oct '25)

- Engineered an end-to-end automated pipeline, reducing the manual time required for exam paper creation by an estimated 70%.
- Pioneered a Chain of Thought (CoT) agentic workflow using LangGraph to dynamically generate original MCQs, plausible distractors, and step-by-step solutions, achieving 98% accuracy in structured JSON output.
- Developed a Hybrid RAG system to ground AI models in conceptual knowledge, ensuring high factual accuracy and syllabus relevance across 90% of generated questions.
- Implemented a dynamic personalization engine that analyzes user test history to identify and reinforce weak topics, improving targeted learning.

CERTIFICATION PROGRAM

- CS50 by Harvard (edX) : Introduction to Python Programming
- CS50 by Harvard (edX) : Introduction to Artificial Intelligence with Python

CO-CURRICULAR AND EXTRA-CURRICULAR ACTIVITIES

- Smart India Hackathon (SIH) :- Selected for Institute Round
- CSIRO - Image2Biomass Prediction (Kaggle) :- Achieved a Leaderboard Rank of 3,293 with a score of 0.26
